

PAINLESS

Lead-Free Assembly

Transition Relief for:

*Shrinking Process Windows
Higher Process Temperatures*

*Improving Production Quality
Maximizing Peak Productivity*

The SlimKIC® 2000-LF Process Set Up Kit is designed to ease the transition of your lead free production. User friendly software alleviates the time consuming tasks of defining your process window and profiling set up. Add the optional KIC Auto-Focus™ optimization software and enjoy completely painless lead free production!

The SlimKIC 2000-LF Kit includes:

- SlimKIC 2000 Thermal Profiler
- Stainless Steel Thermal Shield rated to 350°C
- Thermocouples rated to 400°C
- Aluminum tape for convenient TC attachment
- Optional KIC Auto-Focus optimization software
