

Tools for the Electronics Industry

Design for Test and Manufacturing

Assembly

Test and Verification

Corporate Wide Productivity

Design for Test and Manufacturing:

- JTAG , CircuitCAM,

Assembly:

- Aegis CIM software
- ASM Siplace SMT equipment
- Reflow, Selective, Wave, and Vapor Phase
- ASYS loaders, buffers, conveyors, and routers
- KIC thermal profiling analysis tools
- Data I/O in-line and batch device Programmers
- Hand cutters
- MSD tracking to IPC/JEDEC J-STD-033

Test and Verification:

- KohYoung 3D AOI and 3D Paste inspection
- Electronic Microscopes
- JTAG Board Testing and Device Programming
- X-Ray inspection systems
- Hirox BGA Scopes
- Focalspot soldering stations, BGA/SMD repair workstations
- QA Tech Test Probes

Lead Free Capable:

- Cogiscan device and material tracking tools
- Reflow, Selective, Wave, Vapor, and rework
- KIC Thermal profiling tools
- Lead Detection Systems
